## **GEOGRAPHIC LOCATION DESCRIPTION**

Rhode Island's GLD for federal waters includes the area described and evaluated as part of the Rhode Island Ocean Special Area Management Plan (SAMP). This area includes the federal portions of Block Island Sound and Rhode Island Sound as well as portions of the Atlantic Ocean (*see* Figure 1 below). Specifically, the GLD is a polygon starting from the seaward limit of Rhode Island state jurisdiction at 3 nm from the shoreline and extending seaward to 30nm from the mainland, and approximately 45nm wide between the seaward boundaries with Massachusetts and Connecticut. The western edge of the GLD starts off at a point southeast of Watch Hill Point at [-71.7918916, 41.2730533] and follows the Rhode Island/ Connecticut and Rhode Island/New York waters border South-Southwest to [-71.8053126, 41.0368549], then extends out into federal waters South-Southeast to [-71.7830932, 40.9476722]. The southern edge starts at this point, follows an arc out to [-71.5169896, 40.9122479], and then follows a line East to [-70.8489868, 41.0276451] in federal waters. The eastern edge starts at this point and then follows a line North to the Massachusetts state waters boundary at [-70.8669827, 41.2127751], then follows the Massachusetts state/federal seaward boundary to the seaward extent of the Rhode Island/Massachusetts boundary at [-71.0910046, 41.4370765]. *See* Figure 1 below for a precise map of the GLD. If the precise location of a project within the GLD is of concern, the CRMC has on file the thousands of geographic coordinates that are the basis for the GLD boundary, and can make these available on a project by project basis.

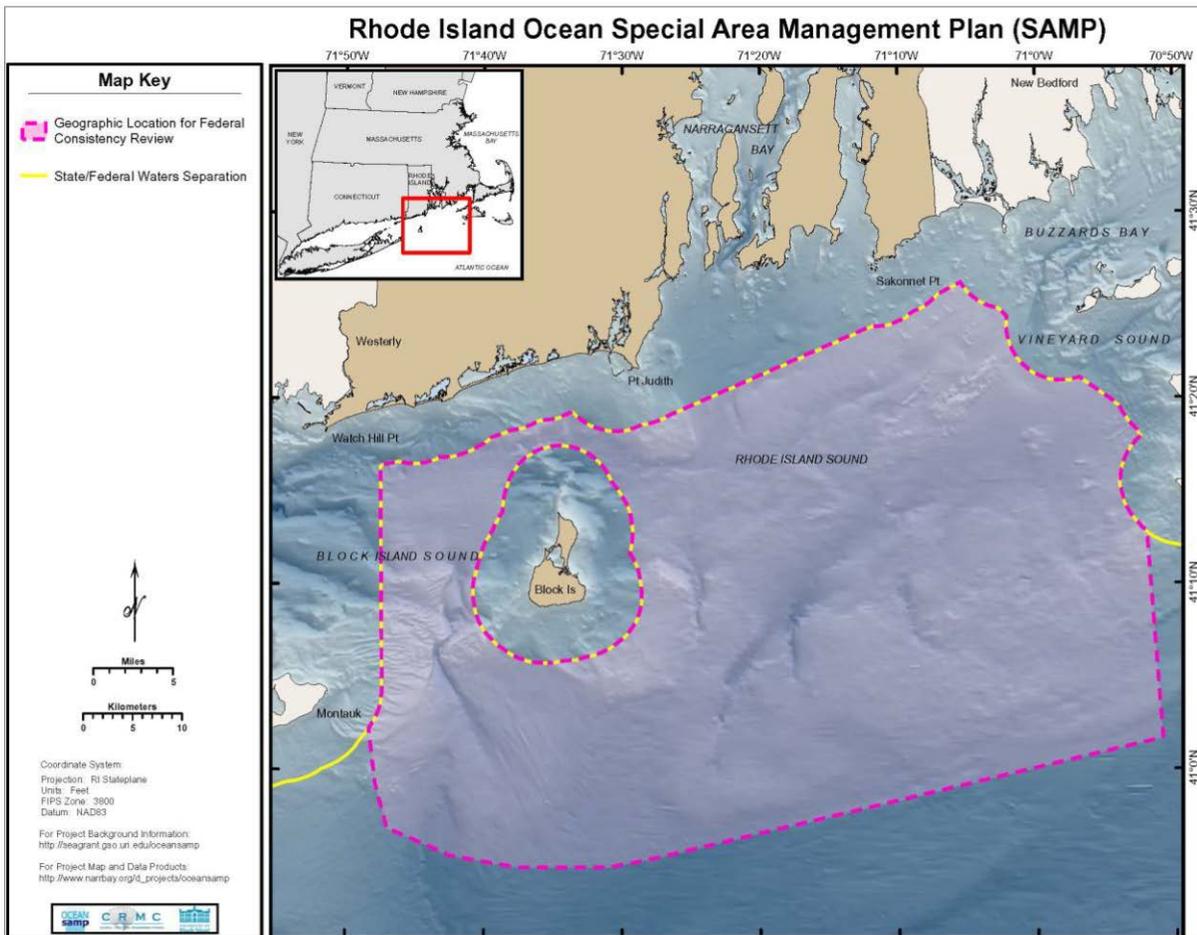

Figure 1. Geographic Location Description Boundary.

### Thresholds and Exclusions:

Federal consistency review of federal license or permit activities is *only* sought for the following type of projects proposed for the GLD. The following thresholds apply to all of the licenses and permits listed in Table 2:

- i. any offshore wind facilities, wave generation device(s), and tidal or ocean current device(s) of a permanent nature, regardless of size;
- ii. offshore LNG platforms (1 or more);
- iii. artificial reefs (1/2 acre footprint and at least 4 feet high), except for projects of a public nature whose primary purpose is habitat enhancement
- iv. Underwater cables;
- v. Mining and extraction of minerals, including sand and gravel;
- vi. Aquaculture projects of any size;
- vii. Dredged material disposal; and
- viii. Meteorological towers deployed in lease blocks within the Area of Mutual Interest (AMI area) between Rhode Island and Massachusetts where mobile gear fishing activity is prevalent (OCS lease blocks 6816, 6817, 6864, 6865, 6866, 6867, 6914, 6915, 6916, 6964, 6965, 6966, 6967, 6968, 7014, 7015, 7016, 7017, 7018, 7019, 7020, 7021, 7064, 7065, 7066, 7067, 7068, 7069, 7070, 7071, 7114, 7115, 7116, and 7117; see Figure 2).

In addition, the following types of federal licenses and permits and federal agency activities shall be *excluded* from federal consistency review as having either no reasonably foreseeable coastal effect or insignificant effects not warranting federal consistency review.
